PRODUCT - DuoLoc Universal Optical Adapter

FEATURES

Universal Optical Adapter

The **DuoLoc** is a Universal Optical to Optical adapter. Frequently used as a night vision adapter, the military is using it in place of the old MonoLoc. The **DuoLoc** is a much more versatile adapter and does not require bushings.

The DuoLoc Adapter contains two set screws and a thumb screw to go around an eyepiece of a scope. The opposite end also contains two set screws and a thumb screw to go around the eyepiece of the optical device to be coupled.

A good example is the PVS-18, Litton's Night Vision monocular, the **DuoLoc** becomes an excellent optical adapter for the PVS-18 and the tactical periscope or spotting scope.

The **DuoLoc** is truly a Universal optical to optical coupler. It is now possible to couple just about any Night Vision monocular to a spotting scope or a rifle scope.

SPECIFICATIONS

The **DuoLoc Optical Adapter** is a Universal Optical to Optical adapter where the outside diameter of each eyepiece is adjustable from 12mm (1/2") to 41mm (1 5/8") diameter.

- Dual Ended Lens to Eyepiece Coupler
- Material 6061 T-6 Aluminum
- Finish: 0.0005 Black Anodize Nominal
- Length: 2.5
- OD: 2.125
- ID: 1.7
- No Threads
- Weight: 4.5 oz
- Sizing Spring .005 x 0.50 1095 Spring Steel
- Adjusting Screws: 1/4 20 X .375 Steel
